Mission

KATANA® 刀 is a fire and forget artillery ammunition designed for point fires with a very high accuracy (CEP < 10 meters). By combining its high efficiency warhead and its accuracy, it has a large decisive effect on target. The full calibre guided ammunition enables to defeat high value targets in depth while containing collateral damage area and limiting risks of fratricide.

Fired from every 155 artillery system, KATANA® 刀 maintains the assets of conventional artillery while increasing drastically accuracy.

Advantages

- All weather capability
- High level of accuracy at long range
- Highly efficient warhead loaded with insensitive explosive filling
- Compatibility with all GNSS constellation (Galileo, GNSS and others)
- ITAR Free
- 30 times less ammunition fired than with a conventional ammunition for shorter operational sequences and increased safety for troops and material

Compatibility

with all 155 cal. JbMoU compliant artillery guns

Key features

Weight: 45,6kg

Total length: < 1m.

Warhead: 6kg equivalent TNT

Guidance: dual mode with an Inertial measurement Unit (IMU) and GNSS, semi-active laser as an option.

Operational range when fired with 52 cal. JBMoU systems:
> 45km with Base-Bleed / TCM Zone 6
